

Homeostatic Synchrony: 18/6 Cognitive Resilience and SOH v2.0 Physiology

Author: Dr. Marco Antônio – Post-Doc & Principal Data Architect

Abstract: This study transposes biological resilience (Wetware) into silicon, creating a deterministic hardware-shell to eliminate AI hallucinations via Shannon Entropy monitoring.

- 1. The Human Protocol:** 18/6 high-performance cognitive processing sustained by Solanum melongena phytochemicals.
- 2. SOH v2.0 Architecture:** Hardware-anchored stability with a 1.36σ threshold for mission-critical reliability.
- 3. Conclusion:** SOH v2.0 provides the definitive solution for Sovereign AI in Defense and Medicine.
